Consulting  
Training & support  
Implementations  
Integrations  
Development  
Upgrades

Blue Yonder Warehouse Management is one of the leaders of the global Gartner® Magic Quadrant™ ranking for warehouse management systems.

**It is dedicated to companies with the most intricate needs, executing complex processes.**

To be competitive, you need to constantly improve accuracy and increase the efficiency of warehouse operations. The flow of goods in your warehouse – from the yard to the shipping dock – requires a stable next-generation solution.

Key benefits:

- ✓ **Increased efficiency** - 99,7% reduction of mistakes.
- ✓ **Transparency of the warehouse** - real-time data throughout the supply chain.
- ✓ **50% cost reduction** - investment opportunities in other areas.
- ✓ **50% throughput growth** - fast operations, increased process efficiency.
- ✓ **Paperless operations** - saving time and resources, saving environment.
- ✓ **Active adaptation** - scalability and adaptation to change.
- ✓ **Future-proof solution** - long term process support and application development.
- ✓ **Competitiveness** - brand support in challenging markets.

HKK customer's success stories:

Chief Innovation and Digitization Officer at Rhenus Logistics: "Over the last few years, we've faced a pandemic, a war, inflation, higher labor costs, growing energy expenses and a shift to e-commerce. Our legacy warehouse management systems were simply not flexible enough to respond to these challenges. We needed a world-class solution that could optimize our warehouse performance in a dynamic environment, enabling us to meet customers ever-increasing demands for reliable service and fast delivery."

In just six months, Blue Yonder's warehouse management solution was rolled out for major Rhenus customers in a warehouse in Swadzim, Poland, leading to target wins in terms of speed, efficiency, accuracy and overall customer service. HKK consultants team supported Rhenus by embarking on the path of consolidating all its warehouses into a single WMS solution.

"I confirm that I have dealt with HIT - Kody Kreskowe for the past couple of years, during which time they have provided my business with excellent support in the areas of integration/configuration work with the RedPrairie WMS (both Dispatcher and Discrete) and with infrastructure support. They have been key participants in CEVA projects in Poland, Italy and the Netherlands for CEVA's customers including world leading major Pharmaceutical, Technology, FMCG and Industrial customers. They have also provided training to us in specialized application areas. I can confidently recommend HIT - Kody Kreskowe as a solid and reliable supplier – in fact a partner in our success – and experts in their field." Richard Brown, Vice President IS&S Benelux, Central and Eastern Europe

The decision to implement the Blue Yonder Warehouse Management solution was made from an omnichannel perspective. It supported the operations of the main distribution center for a network of 62 large-format stores in Poland and the Leroy Merlin sales network in Ukraine and Romania.

The project, deployed by HKK team – the sole implementation partner of Blue Yonder in the CEE region - encompassed 3 phases, reflecting Leroy Merlin's main distribution channels: e-commerce, cross-docking and stock (warehousing).

The fruits of the implementation include 24 storage strategies, 4 strategies for automatic allocation of goods to orders, 33 independent mechanisms for creating picking lists, several strategies for automatic replenishment of picking locations, and more than a dozen inventory strategies. The deployment of BY WMS allowed to overcome the biggest barriers of omnichannel - automation of warehouse flow processes and growing stream of returns.

**We have been a solid, certified partner of Blue Yonder (formerly JDA and RedPrairie) for more than a decade.**

This has given us exceptional competence in the design, development, implementation and support of complex logistics projects. Customers from different industries with various scale of operations rely their business capabilities on long term relation with our team.

We just **know how.**

For 30 years now, we have been supporting the optimization of logistics and production processes.

What else we can do for You?

Blue Yonder Labor Management.

Blue Yonder Transportation Management.

Blue Yonder Category Management.

Production management – digital twin software.

Automation and robotics for logistics and production.

AutoID devices, RFID solutions.

Self-adhesive labels and tags, in-house print workshop.

Warehouse and production signage, wayfinding systems.
